Preface

Monthly Survey of Industrial Production and Employment (MIPE) is being conducted/published by Sindh Bureau of Statistics on regular basis since 1970s. This report provides important statistics in respect of industrial production & employment of large Scale Manufacturing (LSM) industries in Sindh.

This report contains information on 61 items manufactured in 22 selected large scale industrial sectors covering 537 industrial establishments (selection on the basis of CMI 2005-06). These industries account for 70.6% of total value added of large scale manufacturing sector in Sindh.

MIPE Report provides information regarding General Index and Quantum Index of Manufacturing (QIM) to base period 2005-06, and analytical analysis on the current status of production and employment in manufacturing sector.

All the efforts are made to improve the industrial statistics and hope this report would prove useful to policy makers, planners, researchers and other data users. Suggestion/recommendations from the users will always be welcomed and appreciated.

Shahzad Fazal Abbasi

Introduction

Industrial Statistics is very essential tool to track industrial growth and implementation of policies in right directions. This sector has great importance for economic development of country. As per the composition of Pakistan's economy in 2019-20, Agriculture Sector is 19.31%, Industries Sector is 19.29% and Services Sector is 61.4%.

According to the Pakistan Bureau of Statistics, for fiscal year 2020 followed partial lockdown situation faced by industrial sector in the country due to COVID-19. A significant impact has been observed in the manufacturing sector, particularly Large-Scale Manufacturing and Small-Scale Manufacturing. In the industrial sector, 2.64% negative provincial growth has been observed (PBS). From the share of industrial sector 12.48% are manufacturing and more specifically 9.5% is Large Scale Manufacturing (LSM) Sector. The role of Sindh province in the Large Scale Manufacturing is very vital. However, Sindh QIM's trend of overall manufacturing index is on declining side which mainly caused by COVID-19. As the Karachi is the largest metropolitan city of Pakistan, according to Karachi Chamber of Commerce and Industry (KCCI) it produces 15% with an annual Gross Domestic Product (GDP). Sindh Business Register (SBR), 2017 established by Sindh Bureau of Statistics, Planning & Development Department shows that 67% establishments/ factories are located in Karachi Division and remaining 33% are located in other districts of Sindh.

For the timely and quality industrial statistics, Sindh Bureau of Statistics, Planning & Development Department has been conducting Monthly Survey of Industrial Production and Employment (MIPE). This survey report includes 61 items manufactured in 22 large scale Industrial sectors from 537 establishments/ factories in Sindh. The sample of 537 firms was drawn from the last Census of Manufacturing Industries (CMI), 2005-06 and these industries account for 70.6% of total value added in terms of production during 2005-06, CMI. However, the recent CMI 2015-16 has been conducted by PBS, as it will be published that will be used as base year and QIM base year will be shifted from 2005-06 to 2015-16. In addition to collection, compilation, tabulation and processing of manufacturing data, Bureau of Statistics also computes monthly Quantum Index of Manufacturing by using the weights of production. The quantum index is an essential indicator to gauge to aggregate monthly production of province.

1. Questionnaire/ Proforma

A questionnaire/ Proforma is a research instrument consisting of a series of questions and other prompts for the purpose of gathering information from respondents. A pre-tested questionnaire is used for the data collection of industrial inputs related to employment and production, attached at **Annex-A.**

2. Methodology

The basic method of data collection for Sindh MIPE is the posting/mailing of MIPE Questionnaires. More than 70% monthly returns are received to this Bureau through mail from industrial units. The non-responding or remaining establishments are visited by the officers/ officials of this Bureau, besides this the method of emailing, fax and telephonic approach are also used for collection of monthly returns and increase the response rate.

3. Editing

All the received returns are scrutinized for accuracy and consistency with previous data by the Industries Section of this Bureau. As per *Unit Calculation Sheet* different units of similar products are converted into the reporting units. In case of huge discrepancy between current and previous returns the factory management is approached to rectify that figures. In the absence establishment's return or non-availability of concerned person the average production of last month or the last month information is repeated for equivalence.

4. Quantum Index of Manufacturing (QIM)

A quantum index is an index based on quantity units of goods such as number or weight. Sindh bureau of Statistics is computing Index on Industrial Production using 2005-06 as base year. Index Series is generated by using Laspyer's Index.

$$QIM = \frac{\sum_{i=1}^n \frac{q_{im}}{q_{i0}} w_i}{\sum_{i=1}^n w_i} \times 100$$

Equation 1Laspyer's Index

q_{im} = Production of ith item during the current month

q_{i0} = Average Production of the same ith item in the base period (2005-06)

w_i = Weight of the ith item in the base period (2005-06)

$\sum_{i=1}^n w_i$ = Total Weight of 22 large scale industrial sectors covering 537 establishments in the base period with respect to the total value added of all the industries covered in CMI in the base year 2005-06.

Analysis

Summary findings on the basis of Index of Industrial Production are as follows:

- Overall Production in January, 2020 is slightly decreased by 0.95% as compared to last month (i.e. December, 2020)
- Overall Production in January, 2021 is considerably higher by 33.49% as compared to corresponding month of last year (i.e. January, 2020) as this month was in the recession period of last financial year 2019-20 because the industrial production is continuously decreasing.
- Cumulative production from July to January (2020-21) is significantly increased by 11.2% as compared to the period of July to January (2019-20)
- Employment during January, 2021 is slightly increased 0.9% as compared to previous month (i.e. December, 2020).
- Employment during January, 2021 decreased around 4% in comparison with January, 2020.
- Average monthly employment during the period of July-January (2020-21) is 7.45% lower than the corresponding period of July-January (2019-20).

Table 1: Series of Quantum Index of Manufacturing (QIM) at (2005-06=100)

Month/ Year	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21
July	255.7	284.0	327.0	290.8	259.7	294.2
August	266.0	287.7	336.4	265.5	220.9	238.5
September	274.2	281.5	330.9	311.3	266.7	295.4
October	247.0	291.4	355.7	287.0	277.0	315.6
November	283.7	317.1	343.2	273.3	280.3	320.5
December	261.7	302.8	341.5	265.2	223.7	350.6
January	297.4	286.1	374.0	321.3	263.8	347.2
February	293.2	283.3	324.5	309.0	313.2	
March	253.9	275.6	341.4	279.7	258.2	
April	250.6	276.8	338.5	258.2	172.1	
May	254.4	283.9	311.3	248.2	199.8	
June	259.0	258.1	307.4	257.6	324.9	
Average (Geometric Mean)	265.9	285.4	335.5	279.7	251.3	

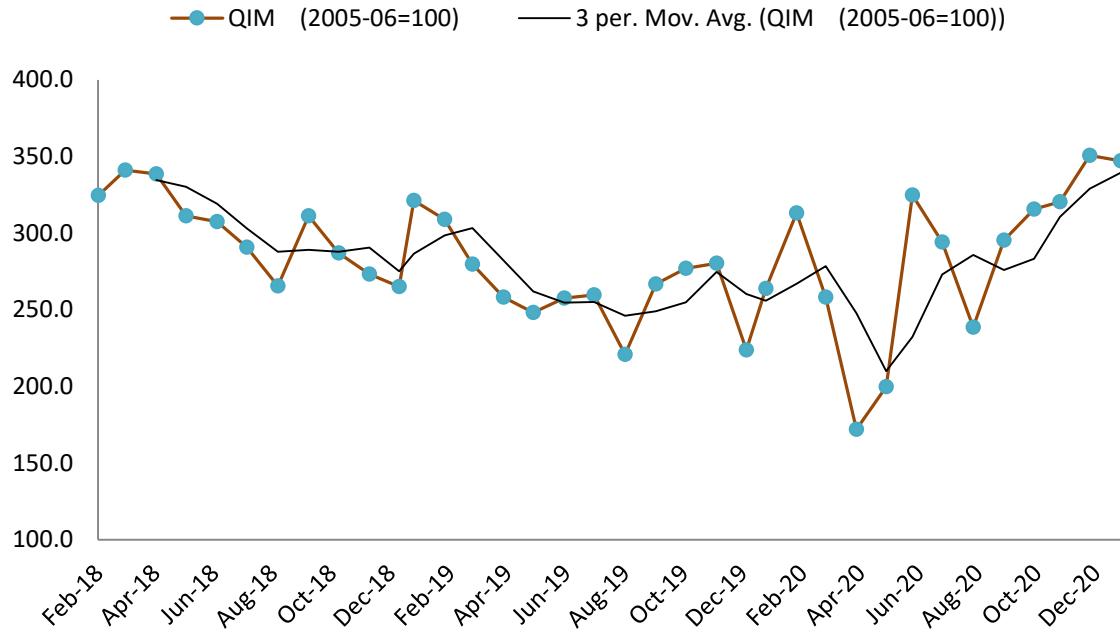

Figure 1: Trend of Quantum Index of Large Scale Manufacturing Industries at base year 2005-06

During the current month mix trend observed in the manufacturing production index. Such as textile, cement, paper and electrical appliances items increasing whereas big drop is observed in some manufacturing products such as fertilizer and soap.

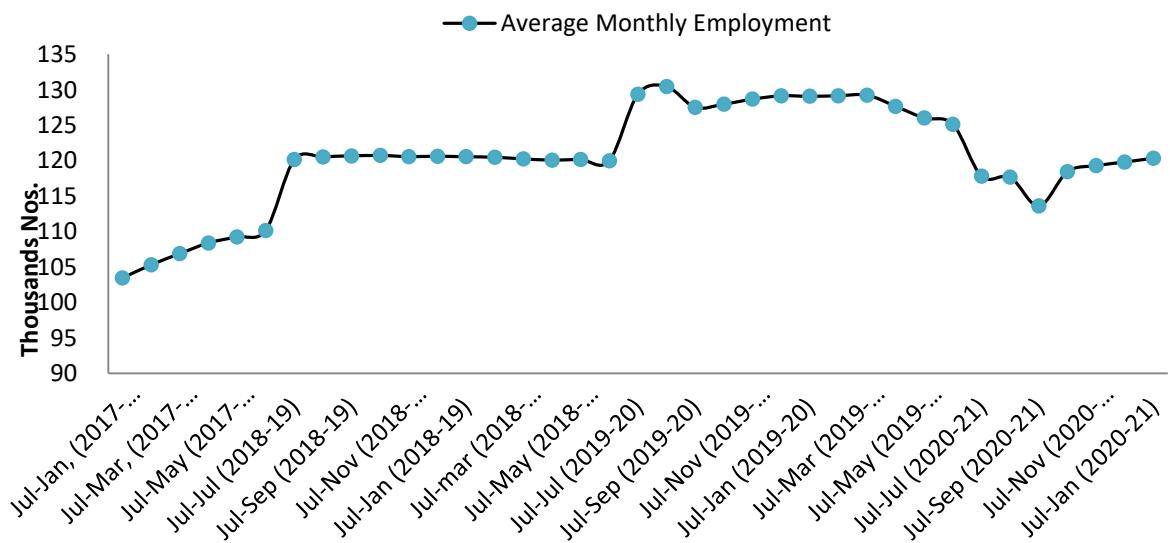

Figure 2: Trend of Average Monthly Employment in Large Scale Manufacturing Industries

Since the production of last six months is showing an upward trend and it's lag impact is reflecting that the Large Scale Manufacturing employment is gradually increasing and graph is showing steady growth.

----------------------	----------------------	----------------------	----------------------

LOCATION CODE

<input type="text"/>	<input type="text"/>
----------------------	----------------------

PART-I GENERAL PARTICULARS

- i) Name and Address of the Establishment _____
- ii) Name, Designation, Telephone, Cell and _____
- Fax# of the person to be contacted. _____
- iii) Website and E-mail Address _____

PART-II PRODUCTION DATA

S.No	Major Items of Production	Code		Unit of Quantity	Code		Previous Month	Current Month	Reasons of Growth/ Decline

PART-III WORKING DAYS AND EMPLOYMENT

- i) No. of days establishment worked _____
- ii) No. of Production workers. Male _____ Female _____ Total _____
- iii) No. of Non production workers. Male _____ Female _____ Total _____
- TOTAL (ii + iii)** Male _____ Female _____ Total _____

Note: Production Workers mean those who are directly associated with production. It includes those engaged in manufacturing, assembling packing repairing etc. Working Supervisor should also be included, Non production worker mean those who are not directly associated with production it includes Administrative Clerical and Services Staff like Chowkidar, Driver and Sweeper.

Signature _____
 Designation _____
 Date _____

Annexure – B: Important Definitions

Large Scale Manufacturing Industries

Establishments where 10 or more employees are working are called large Scale Manufacturing Industries.

Employees

Employees mean all persons whether part time or full time who work in the establishments and receive remuneration in cash or in kind. Working proprietors, unpaid family workers and home workers are excluded from the category of employee. There are two types of employees Production Workers and Non-Production Workers.

- **Production Workers**

Are engaged in work directly associated with production like manufacturing, assembling, packing, repairing etc. Working supervisors and persons engaged for repairs and maintenance are also included.

- **Non-Production Workers**

Include administrative and professional employees, white-collar office employees, drivers, watchmen/guards, peons, sweepers, office boys, etc.
