Preface

Monthly Industrial Production and Employment Survey (MIPE) is being conducted/ published by Sindh Bureau of Statistics on regular basis. This report provides important statistics in respect of industrial production & employment of large Scale Manufacturing (LSM) industries in Sindh.

This report contains information on 66 items manufactured in 18 selected large scale industrial sectors covering 641 industrial establishments (selection on the basis of CMI 2015-16). These industries account for 84.0% of total value added of large scale manufacturing sector in Sindh.

MIPE Report provides information regarding General Index and Quantum Index of Manufacturing (QIM) to base period 2015-16, and analytical analysis on the current status of production and employment in manufacturing sector.

All the efforts are made to improve the industrial statistics and hope this report would prove useful to policy makers, planners, researchers and other data users. Suggestion/ recommendations from the users will always be welcomed and appreciated.

1. Introduction

A robust manufacturing sector promotes domestic production, exports and generates employment, hence stimulates the overall growth of an economy. During FY2023, the Pakistan's economy faced international supply shocks, coupled with domestic natural disaster shock (Flood-2022), these shocks aggravated the growth vulnerability. Pakistan's growth performance in FY2023 has been negatively affected by a decline in the manufacturing sector output. In Pakistan, manufacturing sector contributes 12.01% to Gross Domestic Product (GDP) dominates the overall manufacturing sector and the sector employs 14.9 % of the country's labor force. Pakistan's national accounts divide manufacturing sector into three main categories: Large Scale Manufacturing (LSM), Small Scale Manufacturing (SSM), and Slaughtering. LSM is comprised of businesses with ten or more employees and accounts for 78.4 percent of the Quantum Index of Manufacturing (QIM), which measures LSM performance. The QIM is derived from the Census of Manufacturing Industries conducted in 2015-16. It provides the measure of manufacturing industry outputs and operating status and reliable source for updating the Business Register (BR). According to the Pakistan Economic Survey 2022-23: The industrial sector posted a negative growth of 2.94 percent in FY2023. Industrial sector performance is more dependent on the Manufacturing sector which has a share of 65.0 percent in the industry. LSM is reflected by Quantum Index Numbers (QIM) data and overall, the Manufacturing sector posted a growth of -3.94 percent. For the compilation of Quantum Index of Manufacturing (QIM) of Pakistan as well as the Sindh is concerned, a fresh sample of 641 units was drawn by the Pakistan Bureau of Statistics (PBS) for the computation of Sindh QIM and the sample covers 84% of total of Sindh.

2. Manufacturing Activity

Manufacturing activity is can be defined as the process of making new organic or inorganic articles by chemical or mechanical conversion whether the efforts are carried out by hand or through driven machine at any place either in a factory or in the worker's house. Manufacturing activities include treating, processing, assembling, repairing and services

3. Scope and Coverage

The Census of Large-Scale Manufacturing Industries is conducted by Pakistan Bureau of Statistics (PBS) after every five years with manufacturing establishments classified under (10 to 33 division) Pakistan Standard Industrial Classification (PSIC-2010) based on UN-ISIC.Rev.4. Quantum Index of

Manufacturing (QIM) is a measure of LSM performance with 84.0 weight in overall LSM and derived from the Census of Manufacturing Industries (CMI) 2015-16.

The role of Sindh province in the Large Scale Manufacturing is very vital. However, Sindh QIM's trend of overall manufacturing index has random behavior with ups and downs; which main cause in last year is COVID-19 and recession in economy. As the Karachi is the largest metropolitan city of Pakistan, according to Karachi Chamber of Commerce and Industry (KCCI) it produces 15% with an annual Gross Domestic Product (GDP). Sindh Business Register (SBR), 2017 established by Sindh Bureau of Statistics, Planning & Development Department during the field operation CMI 2015-16 started from January, 2017 shows that 67% establishments/ factories are located in Karachi Division and remaining 33% are located in other districts of Sindh.

For the timely and quality industrial statistics, Sindh Bureau of Statistics, Planning & Development Department has been conducting Monthly Survey of Industrial Production and Employment (MIPE). This survey report includes 66 items manufactured in 18 large scale Industrial sectors from 6,299 establishments/ factories in Sindh.

4. Industrial Classification

For classification of manufacturing activities, Pakistan Standard Industrial Classification (PSIC) 2010, obtained from UN International Standard Industrial Classification ISIC Rev-4, has been used. The PSIC 2010 is an updated version of ISIC Rev.4 from 4 digits to 5-digit level.

5. Frame of Sindh CMI 2015-16

In the Census of Large-Scale Manufacturing Industries (CMI 2015-16) the total frame of LSM stands at 6,299. Sindh Bureau of Statistics has covered 2,517 which is 40% response.

6. Methodology and Questionnaire

6.1. Questionnaire/ Proforma

A questionnaire/ Proforma is a research instrument consisting of a series of questions and other prompts for the purpose of gathering information from respondents. A pre-tested questionnaire is used for the data collection of industrial inputs related to employment and production, attached at Annex-A.

6.2. Methodology

The basic method of data collection for Sindh MIPE is the posting/ mailing of MIPE Questionnaires. More than 70% monthly returns are received to this Bureau through mail from industrial units. The non-responding or remaining establishments are visited by the officers/ officials of this Bureau, besides this the method of emailing, fax and telephonic approach are also used for collection of monthly returns and increase the response rate.

6.3. Editing

All the received returns are scrutinized for accuracy and consistency with previous data by the Industries Section of this Bureau. As per *Unit Calculation Sheet* different units of similar products are converted into the reporting units. In case of huge discrepancy between current and previous returns the factory management is approached to rectify these figures. In the absence establishment's return or non-availability of concerned person the average production of last month or the last month information is repeated for equivalence.

7. Quantum Index of Manufacturing (QIM)

A quantum index is an index based on quantity units of goods such as number or weight. Sindh bureau of Statistics is computing Index on Industrial Production using 2005-06 as base year. Index Series is generated by using Laspayer's Index.

$$QIM = \frac{\sum_{i=1}^n \frac{q_{im}}{q_{io}} w_i}{\sum_{i=1}^n w_i} \times 100$$

Equation 1 Laspayer's Index

q_{im} = Production of i^{th} item during the current month

q_{io} = Average Production of the same i^{th} item in the base period (2015-16)

w_i = Weight of the i^{th} item in the base period (2015-16)

$\sum_{i=1}^n w_i$ = Total Weight of 18 large scale industrial sectors covering 641 establishments in the base period with respect to the total value added of all the industries covered in CMI in the base year 2015-16.

8. Report Analysis

Summary findings on the basis of Index of Industrial Production are as follows:

- Overall Production in month of June, 2024 significantly decreased by 12.6% as compared to last month of May, 2024.
- Production in manufacturing sector for the month of June, 2024 is decreased considerably high by 21.59% as compared to corresponding month of last year.
- Cumulative production from July-June, 2023-24 observed 7.15% decline from previous year as compared to cumulative production of July to June, 2022-23.
- Large Scale Manufacturing employment during June, 2024 is almost stagnant by 0.12% as compared to previous month and similar trend followed like previous month.
- Employment in manufacturing sector for the month of June, 2024 is decreased insignificantly by 1.57% as compared to corresponding month of last year.

Figure 1: Trend of Quantum Index of Large Scale Manufacturing Industries at base year 2015-16

The economic downturn caused the QIM index value to decline rather than rise as the prior report had anticipated. With the exception of food production, all maximum item production showed a declining trend. Seasonal item production may be the cause of the QIM index value being the lowest it has been in the past two years.

Figure 2: Trend of Average Monthly Employment in Large Scale Manufacturing Industries QIM 2015-16

Overall, no significant change has been observed in employment compared to complete fiscal year, but the total workers and production workers showed significant declined from previous year.
