Preface

Monthly Industrial Production and Employment Survey (MIPE) is being conducted/ published by Sindh Bureau of Statistics on regular basis. This report provides important statistics in respect of industrial production & employment of large Scale Manufacturing (LSM) industries in Sindh.

This report contains information on 66 items manufactured in 18 selected large scale industrial sectors covering 641 industrial establishments (selection on the basis of CMI 2015-16). These industries account for 84.0% of total value added of large scale manufacturing sector in Sindh.

MIPE Report provides information regarding General Index and Quantum Index of Manufacturing (QIM) to base period 2015-16, and analytical analysis on the current status of production and employment in manufacturing sector.

All the efforts are made to improve the industrial statistics and hope this report would prove useful to policy makers, planners, researchers and other data users. Suggestion/ recommendations from the users will always be welcomed and appreciated.

1. Introduction

A robust manufacturing sector promotes domestic production, exports and generates employment, hence stimulates the overall growth of an economy. The Census of Manufacturing Industries (CMI) focuses on the production of Large Scale Manufacturing Industries (LSM). It provides the measure of manufacturing industry outputs and operating status and reliable source for updating the Business Register (BR). In Pakistan, manufacturing sector contributes 11.89 % to Gross Domestic Product (GDP) dominates the overall manufacturing sector. During FY 2023, the Manufacturing sector, which contains LSM, small-scale manufacturing, and slaughtering, remained negative because of prolonged growth of LSM, measured through QIM. According to the Pakistan Economic Survey 2023-24, manufacturing sector has a share of 65.25% in Industry. Historically, Pakistan's manufacturing sector has played a crucial role in the country's economic growth. Textiles are Pakistan's most critical manufacturing sector. It has the longest production chain, with inherent potential for value addition at each processing stage, from cotton to ginning, spinning, fabric, dyeing and finishing, made-ups, and garments. The sector contributes nearly one-fourth of industrial value added and employs about 40 percent of the industrial labor force. Barring seasonal and cyclical fluctuations, textile products have maintained an average share of about 54.5 percent in national exports. Industrial sector performance is more dependent on Large-Scale Manufacturing Industries (LSM) as it is measured by Quantum Index of Manufacturing (QIM) i.e., 78.4 %. For the compilation of Quantum Index of Manufacturing (QIM) of Pakistan as well as the Sindh is concerned, a fresh sample of 685 units was drawn by the Pakistan Bureau of Statistics (PBS) for the computation of Sindh QIM and the sample covers 83.9% of total of Sindh.

2. Manufacturing Activity

Manufacturing activity is can be defined as the process of making new organic or inorganic articles by chemical or mechanical conversion whether the efforts are carried out by hand or through driven machine at any place either in a factory or in the worker's house. Manufacturing activities include treating, processing, assembling, repairing and services

3. Scope and Coverage

The Census of Large-Scale Manufacturing Industries is conducted by Pakistan Bureau of Statistics (PBS) after every five years with manufacturing establishments classified under (10 to 33 division) Pakistan Standard Industrial Classification (PSIC-2010) based on UN-ISIC.Rev.4. Quantum Index of

Manufacturing (QIM) is a measure of LSM performance with 84.0 weight in overall LSM and derived from the Census of Manufacturing Industries (CMI) 2015-16.

The role of Sindh province in the Large Scale Manufacturing is very vital. However, Sindh QIM's trend of overall manufacturing index has random behavior with ups and downs; which main cause in last year is COVID-19 and recession in economy. As the Karachi is the largest metropolitan city of Pakistan, according to Karachi Chamber of Commerce and Industry (KCCI) it produces 15% with an annual Gross Domestic Product (GDP). Sindh Business Register (SBR), 2017 established by Sindh Bureau of Statistics, Planning & Development Department during the field operation CMI 2015-16 started from January, 2017 shows that 67% establishments/ factories are located in Karachi Division and remaining 33% are located in other districts of Sindh.

Another important part of this chapter is employment, and according to the Pakistan Labour Force Survey 2020–21, 36.3 million working-age people live in the province of Sindh, whereas 25.4% are engaged with the industrial sector. Annexure-G presents the average monthly employment in selected large scale manufacturing industries. The time series of the last five years shows the highest employment was reported in 2020–21 with a number of employees of 219,210, while the lowest employment in the manufacturing sector was reported in 2018-19 with a number of employees of 119,986. Due to the base year conversion employment percentage changes are not comparable to the last financial year, 2020–21.

For the timely and quality industrial statistics, Sindh Bureau of Statistics, Planning & Development Department has been conducting Monthly Survey of Industrial Production and Employment (MIPE). This survey report includes 66 items manufactured in 18 large scale Industrial sectors from 6,299 establishments/ factories in Sindh.

4. Industrial Classification

For classification of manufacturing activities, Pakistan Standard Industrial Classification (PSIC) 2010, obtained from UN International Standard Industrial Classification ISIC Rev-4, has been used. The PSIC 2010 is an updated version of ISIC Rev.4 from 4 digits to 5-digit level.

5. Frame of Sindh CMI 2015-16

In the Census of Large-Scale Manufacturing Industries (CMI 2015-16) the total frame of LSM stands at 6,299. Sindh Bureau of Statistics has covered 2,517 which is 40% response.

6. Methodology and Questionnaire

6.1. Questionnaire/ Proforma

A questionnaire/ Proforma is a research instrument consisting of a series of questions and other prompts for the purpose of gathering information from respondents. A pre-tested questionnaire is used for the data collection of industrial inputs related to employment and production, attached at Annex-A.

6.2. Methodology

The basic method of data collection for Sindh MIPE is the posting/ mailing of MIPE Questionnaires. More than 70% monthly returns are received to this Bureau through mail from industrial units. The non-responding or remaining establishments are visited by the officers/ officials of this Bureau, besides this the method of Emailing, WhatsApp and Telephonic approach are also used for collection of monthly returns and increase the response rate.

6.3. Editing

All the received returns are scrutinized for accuracy and consistency with previous data by the Industries Section of this Bureau. As per *Unit Calculation Sheet* different units of similar products are converted into the reporting units. In case of huge discrepancy between current and previous returns the factory management is approached to rectify these figures. In the absence establishment's return or non-availability of concerned person the average production of last month or the last month information is repeated for equivalence.

7. Quantum Index of Manufacturing (QIM)

A quantum index is an index based on quantity units of goods such as number or weight. Sindh bureau of Statistics is computing Index on Industrial Production using 2015-16 as base year. Index Series is generated by using Laspayer's Index.

$$QIM = \frac{\sum_{i=1}^n \frac{q_{im}}{q_{io}} w_i}{\sum_{i=1}^n w_i} \times 100$$

Equation 1 Laspayer's Index

q_{im} = Production of i^{th} item during the current month

q_{io} = Average Production of the same i^{th} item in the base period (2015-16)

w_i = Weight of the i^{th} item in the base period (2015-16)

$\sum_{i=1}^n w_i$ = Total Weight of 18 large scale industrial sectors covering 641 establishments in the base period with respect to the total value added of all the industries covered in CMI in the base year 2015-16.

8. Report Analysis

Summary findings on the basis of Index of Industrial Production are as follows:

- Overall Production in month of July, 2025 is decreased by 2.28 % as compared to last month of June, 2025.
- Production in manufacturing sector for the month July, 2025 is significantly increased by 3.83% as compared to corresponding month of last year.
- Large Scale Manufacturing employment during July, 2025 is significantly decreased by 3.53% as compared to previous month and similar trend followed like previous month.
- Employment in manufacturing sector for the month of July, 2025 is drastically decreased by 4.17% as compared to corresponding month of last year.

Figure 1: Trend of Quantum Index of Large-Scale Manufacturing Industries at base year 2015-16 in July.

In July 2026, QIM declined marginally and reflecting overall stability in manufacturing activity. The June performance was mixed, with growth in electrical equipment, fabricated metals, chemicals, pharmaceuticals and motor vehicles, while beverages declined.

Figure 2: Trend of Average Monthly Employment in Large Scale Manufacturing Industries QIM 2015-16

The latest figures indicate a slight decrease in QIM, indicating a downward trend in manufacturing activity toward the end of the period. However, Total Employees significantly decreased, reflecting downward trend in industrial employment conditions. While Production Workers slightly decreased.
